

# Wood Wharf

## Capital | Thermal

Wood Wharf boasts a 13 story, 2 million sq. ft mixed-use waterside workspaces and a further 490,00 sq. ft of shops, restaurants, and community spaces. With high quality, warehouse-style design catering to a varied community of businesses.

Capital Thermals' first job with both NG Bailey and the Canary Wharf Group, provided the Shell and Core areas with Acoustic Insulation, Thermal Insulation and Trace Heating completing each of the four fit outs with precision. The Plant Skids, in particular, required significant metal fabrication, and valve jacketing kept the team focused on making sure they fitted each to the highest specification.

Overall service provided on this project:

Acoustic  
Insulation

Thermal  
Insulation

Trace  
Heating
