

Tower Hamlets Civic Centre

Capital | Thermal

A new construction building that incorporates the old Royal London Hospital which is a Grade II listed building, was commissioned as the headquarters of Tower Hamlets London Borough Council.

Capital Thermal Services provided the Thermal Insulation, Trace Heating, Acoustic Insulation, and Aluzinc Cladding to all exposed services for this project.

This was a showcase project for the skill implemented by the team, with almost all services being installed in an “exposed to view” manner, all systems were insulated and finished with architectural Alu Zinc Cladding.

Overall service provided on this project:
