

UCL Marshgate

Capital | Thermal

University College London's Marshgate is part of the first phase of UCL East's new campus. Boasting 34,000 sq. metres of cutting-edge multidisciplinary research and learning space, recently referred to as a "Living Lab".

Capital Thermal Services provided the Fabrication and Installation of Brushed, Stainless Steel Cladding to the External Flue systems.

As a result of our work, the Main Construction team and Designers were able to save 1200 tonnes of Carbon. The project gave our team the opportunity to showcase our high skill set, working closely with Architect approvals.

Overall service provided on this project:

Fabrication

Stainless
Steel
Cladding

WHAT

University Campus
Building

WHERE

London

COMPLETED

3 months

PROJECT VALUE

£50,000
