

Royal Wharf

Capital | Thermal

Royal Wharf boasts 3,385 residential units; 11,150 sq m of retail and business use; concierge service, gym/swimming pool, landscaped park and riverside walk.

Providing the Thermal Insulation to Cold Water Storage Tanks for the building, we were able to offer a solution to a specific problem the client was experiencing. The issue was that the stored cold water was being delivered at a temperature higher than desired. We were able to insulate them to alleviate the issue and provide a mechanical protection for longevity.

Overall services provided on this project include:

Thermal
Insulation

Venture
Clad
