

Old Bailey

Capital | Thermal

Carrying out a full replacement of the roof-level air handling units (AHUs) to deliver more efficient heating and cooling for the iconic Old Bailey courthouse in London.

Capital Thermal provided thermal insulation, acoustic insulation, and trace heating.

This was our first Ministry of Justice project, where we collaborated closely with both Tilbury Douglas and our team in a high-security environment, meeting the building's demanding specifications and achieving an exceptional finish.

Overall services provided on this project include:

Thermal
Insulation

Acoustic
Insulation

Trace
Heating
